GLOBAL MARKET

@umarnaq • August 2026

The Goal^{2 / 3}

Build the app the fragrance community deserves — and turn it into a sustainable business.

What Exists Now

- **Fragrantica/Parfumo** — massive databases, but collection features are web-only, clunky
- **No real mobile app** — the "apps" are wrapped websites with terrible UX
- **No layering engine** — thousands of forum posts, zero algorithmic answers
- **Spreadsheets** — most collectors use Google Sheets/Notes. Manual, no intelligence
- **Clone tracking** — zero support for the exploding clone/alternative market

What ScentLab Will Be

- **Mobile-first collection manager** — native iOS app with proper UX
- **AI Layering Engine** — pick 2+ fragrances, get compatibility with reasoning
- **500+ pre-loaded fragrances** — designer, niche, clones, searchable
- **Clone tracking** — see all alternatives for any designer scent
- **Creator mode** — shareable collection screenshots for TikTok
- **Cloud sync** — across iPhone, iPad, Android, and web

✅ **Working prototype exists** — 88 verified fragrances, search/filter UI, functional layering engine.

GLOBAL RANK

#5

BEAUTY CATEGORY

Fragrantica Audience (Similarweb, Jul '26)

- 53% female / 47% male — split audience, not niche
- Largest group: 25-34 (31%) — prime app-user demographic
- Top country: US (39% traffic) — high App Store spend
- Engagement: 4.67 pages/visit, 5 min avg
- Traffic: 60% organic search — massive SEO moat
- Est. registered: 2-5M users

The Gap — Zero Competition

PLATFORM	USERS	MOBILE	LAYERING	CLONES
Fragrantica	46.1M	✗ Wrapper	✗	✗
Parfumo	1-2M	✗ Basic	✗	✗
Basenotes	500K-1M	✗	✗	✗
Spreadsheets	Unknown	✓ Manual	✗	✗
Scent Lab	0 → ?	✓ Native	✓ AI	✓ Built-in

- Why Nobody Has Built This

 - Fragrantica sells ads — mobile app doesn't grow their ad revenue
 - Domain gap — must collect fragrances to build proper layering engine
 - Not a VC play — lifestyle biz, VCs pass; creators build
 - Perfect timing — clone market exploding, FragTok massive

Key insight: 46M visitors — none can organize in native app. Blue ocean.

What It Costs

How much to build, launch, and run ScentLab — on a shoestring budget.

App Development

ITEM	COST
Apple Developer Program	RM 399/yr
React Native (Expo)	RM 0 (free)
Firebase (Spark → Blaze)	RM 0 – 100/mo
App icon + screenshots (DIY)	RM 0 – 500
Domain + landing page	RM 60 – 120/yr

Company Setup

ITEM	COST	TYPE
Sdn Bhd registration	2,000 – 3,500	One-time
MSC Malaysia status	500 – 1,500	One-time
Employment Pass	2,000 – 4,000	One-time
Corporate secretary	1,000 – 2,000/yr	Annual
Nominee director	1,000 – 2,000/yr	Annual
Bank deposit (refundable)	1,000 – 10,000	Refundable

Monthly Run Rate

ITEM	COST
Firebase (10K-50K users)	~RM 50 – 150
Apple Developer (amortized)	~RM 33
Domain + hosting	~RM 10
Corporate sec (amortized)	~RM 100 – 170
Monthly Total	~RM 200 – 400

Why I Can Do This Cheap

- **Dev:** RM 0 — AI partner builds the app with me, no outsourcing
- **Marketing:** RM 0 — 800K+ followers, no paid ads needed
- **Database:** RM 0 — 88 fragrances already researched/verified
- **Hosting:** near-zero — Firebase free tier covers 10K users

~RM 8,000 – 14,000

Total first-year investment — company + app
(~\$1,800 – \$3,200 USD)

What I Can ^{5 / 8}Make

Projections based on real data and app store benchmarks.

MY TOTAL REACH

Revenue Model		
STREAM	PRICE	NET AFTER APPLE
Paid App Download	\$4.99 one-time	\$3.49
Premium Upgrade	\$2.99/yr	\$2.09
In-App (themes, stickers)	\$0.99 – 2.99	~\$0.70 – 2.10

Year 1 Revenue Scenarios			
SCENARIO	DOWNLOADS	REVENUE	NET PROFIT
Low (organic only)	500	~\$2,800	~\$2,500
Moderate (TikTok + list)	3,000	~\$17,500	~\$16,600
Good (viral + community)	10,000	~\$58,500	~\$57,000

Even Low covers costs. Break-even at 500 downloads.

Where Numbers Come From

- 46M monthly users — 0.01% conversion = 4,600 downloads
- FragTok: 10B+ views — one viral video = thousands
- Collectors spend RM200-2K per bottle. \$4.99 is change
- App Store: utility apps convert 2-5% of page views
- My audience: 800K+, 1% = 8,000 downloads

The Killer Math

At Moderate (\$17,500), Year 1 revenue covers ALL costs. Everything after is profit.

Break-even: 3-6 months. Even with zero virality.

Development Roadmap

6 weeks to MVP. Built with AI assistance. Zero outsourcing.

Week 1-2: Foundation

- React Native (Expo) project
- Firebase Auth + Firestore
- Migrate 88 → 500+ fragrances
- Core CRUD (add/edit/delete)
- **Milestone:** See fragrance in list

Week 3-4: Core Features

- Search + filter (brand, notes, season)
- Fragrance detail + full pyramid
- **Layering Engine**
- Collection dashboard stats
- **Milestone:** Full mgmt + layering

Week 5-6: Launch

- Premium (in-app purchase)
- TikTok share feature
- Cloud sync
- TestFlight + App Store assets
- **Milestone:** App Store submission

Post-Launch (Month 2-3)

- Barcode scanner — scan → auto-fill
- Android — same codebase
- Community feed
- Advanced layering (3+ combos)
- Export JSON/CSV

Future (Month 3-6)

- Photo recognition — snap bottle pic
- Web app — desktop browser
- Scent of the Day — Stories stickers
- Affiliate links — extra revenue

7 / 8

My Advantage

Why I'm the right person to build this.

What I Bring

- **Domain expertise** — I own 88+ fragrances. I know notes and clones
- **800K+ followers** — built-in distribution, no ads needed
- **In the community** — brands pay me (YSL, Mykonos, Velixir)
- **AI-assisted dev** — partner builds with me. Zero dev cost
- **Self-funded** — no investors. RM 8-14K all-in

Distribution (Zero Ad Spend)

CHANNEL	REACH	COST
TikTok — layering demos	10K-100K views	\$0
"I built an app" content	Viral format	\$0
Email waitlist pre-launch	1K-5K signups	\$0
Reddit: r/fragrance (1.5M)	Active community	\$0
r/fragranceclones (100K+)	Clone enthusiasts	\$0

Risk vs Reward

RISK	MITIGATION
App doesn't sell	Only RM 8-14K. Break-even at 500 downlds
Too busy with content	AI partner builds. I do product + marketing
EP not approved	Launch as passive shareholder on current EP
Fragrantica copies	Web company. 18 years, zero mobile

The Bottom Line

METRIC	VALUE
Total upfront investment	RM 8,000 – 14,000
Monthly run cost	RM 200 – 400
Break-even (moderate)	3-6 months
Year 1 revenue (moderate)	~\$17,500 (~RM 80K)
Year 1 net profit	~RM 66,000 after costs

Time to Build

46M monthly fragrance enthusiasts. Zero dedicated apps. 800K+ followers as a launchpad. A working prototype with 88 verified scents. Total cost: less than two bottles of niche perfume.
